

Solution 1:

The background-color property is used to specify a solid background color. The possible values for the background-color property are:

PROPERTY VALUE:

1: background-color <color>.

2: transparent Initial value: transparent.

Solution 2:

`{background-repeat: repeat-x;}` declaration causes background image to be tiled only along the x-axis.

Solution 3:

The no-repeat keyword turns off tiling altogether, and the background image will be displayed only once.

Solution 4:

To offset image 10px from left:

```
{background-position: left 10px; }
```

To offset image 10px from top:

```
{background-position: top 10px; }
```

Solution 5:

`{background-attachment:scroll}` property enables the image to scroll along with the webpage.

Solution 6:

If the fixed keyword is provided, the background image remains in place while the page scrolls.

Solution 7:

Following css declaration contains all the five properties in one:

```
body{background-color:red;  
      background-attachment:fixed;  
      background-image: url(bg-page.png);  
      background-position:bottom right;  
      background-repeat:no-repeat;}
```
